Subject Index

- Abdominal fluid, acellular specimen, cytologic diagnosis of ovarian mucinous cystoma from, 672
- Adenocarcinoma
 endometrium
 endometrial irrigation smear used in detection, 163
 new technique for detection, 496
 uterus, computer assisted identification of cells from, 21
- Adrenalectomy, bilateral, effect on induction of carcinoma of mouse cervix uteri, 347
- Aerosol fixative, hair spray, inexpensive for cytodiagnosis, 416
- Allograft, renal, recipients' urine as used in diagnosis of cytomegalic inclusion disease, 605
- Amnion
 histochemical properties of fluid cells in, 389
 injection of hypertonic solutions in second trimester of pregnancy, 99
- Amniotic fluid cells, histochemical properties of, 389
- Analysis
 chromosomal, in progressive lesion of the cervix, 76
 computer, of lymphocytes in transformation, 557
 of results of cytodiagnosis during operation, 359
- Anemias, folate related, effect of systemic therapy on nuclear size of oral epithelial cells, 84
- Animals, malignancy related changes in peripheral blood following transplant of tumors, 443
- Anovulation, treatment with clomiphene citrate or gonadotropins, discrepancies between col-pocytology and urinary steroid excretion, 332
- Antibodies, immunofluorescent, and mycoplasma-like forms, in rete malpighii, pemphigus vulgaris and pemphigus vegetans, 169
- Aspiration, cul-de-sac needle, normal and abnormal cytology and value in detection of ovarian cancer, 507
- Aspiration Biopsy, *see* Biopsy
- Atypia, bronchial epithelium, in wind instrument players and singers, 274
- Autoradiographic studies, exfoliated cells of the cervix uteri, 36
- Autoradiography, exfoliated epithelial cells in malignant bladder mucosa, 128
- Autosynchrony, with self-induced mitosis in sarcoma cell networks, 576
- Azathioprine (Imuran) therapy, cervical dysplasia associated with, 373
- Biopsy, aspiration of salivary gland tumors, 59
- Bladder, mucosa, malignant, study using autoradiography of exfoliated epithelial cells, 128
- Blood cells, computer discrimination, from two cases of "leukemic" lymphosarcoma, 688
- Book reviews
 Cytopathologie Des Épanchements Des Séreuses, 111
 Diagnostic Cytology and Its Histopathologic Bases (2nd edition), 111
- Bronchi, epithelium atypia, in wind instrument players and singers, 274
- Bronchus, epithelial cell abnormalities, proposed classification, in the category of dyskaryosis, 459
- Cancer
 cervix uteri, cytologic detection planning, in Sweden, 117
 follow-up studies after treatment, 323
 microinvasive squamous, 447
 metastatic, cytopathologic diagnosis of by cervical and vaginal smears, 377
 oral, early detection by cytology, 502
 ovarian, value of cul-de-sac needle aspiration in detection of, 507
 patients, significance of circulating megakaryocytes in peripheral blood, 142
 see also Carcinoma
- Carcinoma
 adenocarcinoma, endometrium, new technique for detection, 496
 adenoid cystic, morphologic studies on smears and histologic sections from 45 cases, 59
 cervix uteri
 correlated with vaginal microbiology, 224
 ethnic distribution in cytologic screening program, 139
 in the mouse, effect of bilateral adrenalectomy and ovariectomy on induction, 347
 irradiation atypia in mouse, 620
 cytology, urinary, in cervix uteri, 542
 ectocervical, membrane cytologic technique, using tenovus applicator, 119
 endometrial
 cytodiagnosis, observations on cell morphology in, 369
 cytology anteceding overt, 523
 observations on cell morphology, 530
 hypochromic, criteria of neoplastic cells, 485
 induced, in hamster's pouch, reliability of exfoliative cytology, 94
 occult, diagnostic method in pulmonary cytology, 645
 tracheal, 255
 vaginal *in situ*, following hysterectomy, 158
 see also Cancer
- Carcinoma *in situ*
 cervix uteri, sex chromatin in exfoliated cells of, 634
 squamous, of the cervix uteri, in the aged, comparative cytopathology of, 27
- Cell, *see* specific type or anatomical location.
- Cell distribution technique, 541
- Cell recognition from line scan transition probability profiles, 210
- Cellular atypias, as part of the microbiology of the female reproductive tract, 64
- Cerebrospinal fluid, postmortem study, with histologic correlation, 48
- Cervical pemphigus, cytology of, 656

- Cervical screening, routine, of in-patients in a voluntary hospital, 455
- Cervix uteri
- cancer
 - cytologic detection, planning, in Sweden, 117
 - microinvasive squamous, 447
 - carcinoma
 - chemically induced, irradiation atypia as seen in mouse, 620
 - correlated with vaginal microbiology, 224
 - ethnic distribution in cytologic screening program, 139
 - follow-up studies after treatment, 323
 - squamous carcinoma *in situ*, in the aged, comparative cytopathology, 27
 - urinary cytology in, 542
 - carcinoma in mouse, induction, as affected by bilateral adrenalectomy and ovariectomy, 347
 - carcinoma *in situ*, sex chromatin in, 634
 - cells exfoliated from two-wavelength Feulgen Cytophotometry of, 583
 - computerized recognition of glandular cells, 611
 - cytology, early puerperium, 136
 - dysplasia associated with azathioprine (Imuran) therapy, 373
 - dysplasia of, correlated with vaginal microbiology, 224
 - dysplasias, DNA in epithelial cells as observed by microspectrophotometry, 232
 - epithelium, cell lipids from, during menstrual cycle, 260
 - exfoliated cells
 - autoradiographic studies, 36
 - scanning electron microscope used in detecting changes in surfaces of, 288
 - Hodgkin's disease in, as found in smear, 652
 - periphagus of, 656
 - progressive lesion, chromosome analysis of, 76
 - routine screening of in-patients in a voluntary hospital, 455
 - smear
 - cytophotometric study of (letter to editors), 57
 - diagnosis of metastatic cancer by, 377
 - Herpes simplex virus infection detected in, 354
 - lactic dehydrogenase and glucose-6-phosphate dehydrogenase in, 264
 - tuberculosis, 104
- Cheek, X-chromatin, frequency in diseases, 700
- Chemical induction, of carcinoma in mouse cervix, 620
- Cherry Hill, (editorial), 371
- Chromatins
- nuclear, as observed by polarized dark-field oblique-illumination microscope, 218
- sex
- in exfoliated cells of cervical carcinoma *in situ*, 634
 - variability of counts, 72
- Chromosome
- analysis in a progressive lesion of the cervix, 76
 - human, arrangement of DNA, as investigated by quantitative electron microscopy, 188
 - X, late replicating, size variation, in leukocytes of individuals with hyperplastic and malignant lesions of uterine epithelium, 238
- Cilia, of epithelium cytologic and cytochemical aspects in differentiation of nasal inflammatory diseases, 515
- Ciliated epithelium, cytologic and cytochemical aspects of in differentiation of nasal inflammatory diseases, 515
- Circulation, peripheral blood significance of megakaryocytes in cancer patients, 142
- Clomiphene citrate, as used in treating anovulatory sterility discrepancies between colpocytology and urinary steroid excretion, 332
- Colon, exfoliative cytology evaluation of simplified technique for, 53
- Colpocytology
- aid in treating schizophrenia, 133
 - and urinary steroid hormone excretion, in treatment with clomiphene citrate or gonadotropins for anovulatory sterility, discrepancies between, 332
 - see also* Vagina, cytology
- Colposcope, used in diagnosing leukoplakias in primary sterility, 685
- Computer
- in identification of cells from uterine adenocarcinoma, 21
 - program for cytology records, 7
 - used in recognition of uterine glandular cells, 611
- Computer analyses, of lymphocytes in transformation, 557
- Computer discrimination, of blood cells from two cases of "leukemic" lymphosarcoma, 688
- Computer processing, medical narrative data application to vaginal cytology, 327

 - epithelial, in malignant bladder mucosa, autoradiography of, 128
 - of cervical carcinoma *in situ*, sex chromatin in, 634
- Exfoliated epithelial cells, autoradiography in malignant bladder mucosa, 128**
- Exfoliative cytology**
- colonic, evaluation of simplified technique for, 53
 - induced carcinoma in hamster's pouch, reliability, 94
 - oral, pemphigus, 108
- Fetus, membrane, ruptured, study by Nile blue sulfate staining, 154**
- Feulgen cytophotometry, two-wavelength, of cells exfoliated from cervix uteri, 583**
- Fluid**
- abdominal, acellular specimen, cytologic diagnosis of ovarian mucinous cystoma, 672
 - cerebrospinal, postmortem study of, with histologic correlation, 48
 - culdocentesis, containing benign papillary structures with psammoma bodies, 178
- Fluorescence, intracellular tetracycline in normal and neoplastic lymphocytes, 246**
- Folate, related anemias effect of systemic therapy on nuclear size of oral epithelial cells, 84**
- Frozen sections, cytodiagnosis, comparison and analysis of results during operation, 359**
- Fungus in clinical material, teaching of presence, 488**
- Fungus infections, cytopathologic diagnosis of, method for preparation of simulated cytopathologic material for the teaching of fungus morphology in cytology specimens and the presence of fungus in clinical material, 488**
- Fungus morphology in cytology specimens, teaching of, 488**
- Gastric cytology**
- evaluation of methods and results in 1,670 cases, 399
 - initial experience in a routine service, 637
- Glandular cells**
- computerized recognition in cervix uteri, 611
 - of uterus, computerized recognition in a self-learning program, 662
- Glioblastoma, tissue culture study, with addition of autologous lymphocytes, 42**
- Gonadotropins, as used in treating anovulatory sterility discrepancies between colpocytology and urinary steroid excretion, 332**
- Granules, hematoxylin staining, histochemistry, in vaginal epithelium of proestrus guinea pig, 89**
- Hair spray, as an inexpensive aerosol fixative for cytodiagnosis, 416**

- Hematoxylin, staining granules, histochemistry in vaginal epithelium of proestrus guinea pig, 89
